### Professional experience

- 9/2005-present **Farm worker**

Part-time work while looking for a position in IT.

- 2005 **Training course in PSA Peugeot Citroën (Belchamp Site) : 4 months**

#### Description of the company :

PSA Peugeot Citroën is the 2nd European car industry company.

Long before their market launch, cars of the PSA Peugeot Citroën Group are extensively tested at the Belchamp Test Center under a variety of extreme conditions.

Work : Programmer.

Duties: I was working in the team who validates the good working of electronic calculators integrated in vehicles with the aid of simulator benches.  
My project was to develop some application parts to allow the automation of particular tests. I used the language C++ and some specific softwares such as NI TestStand (a test sequencer) to achieve the project.

- 2004            **Training course in Crédit Agricole (Pyrénées Gascogne Center) : 6 weeks**

Description of the company :

The Crédit Agricole Bank is the first bank in France. The Pyrenees Agricole center is one of the regional units.

Work : System Administration under Linux Operating System.

Duties: I was working in the team of network administrators. I had 2 missions :

-Linux Infrastructure:

Standardization of the automatic installation of Red Hat Linux 3.0 Enterprise with some basic softwares: Samba, XDMCP, VNC, Webmin, FTP.

-Back Up Software:

Knowledge acquisition in the Netvault Backup software to ensure the functions of following exploitation and the recovering on user request.

- 2003            **Training course in Crédit Agricole (Pyrénées Gascogne Center) : 6 weeks**

Work : Administration System under Linux Operating System.

Duties: I was working in the team of network administrators.

I worked with the VMware software (virtual machines). I tested the VMware software under a Linux test server and I wrote procedures for the administrators to deploy this software to the Linux's servers in exploitation.

- 2002            **Training course in Pyrénées Modele 64. : 4 weeks**

Description of the company :

Pyrénées Modele 64 is a store which sell RC models.

Work : Web Site development.

Duties:

I developed with a another trainee a Web Site presenting the store and the products which are sold. We used the languages HTML, Javascript and PHP to develop this WebSite.

## **Spare-time:**

- Cycling.
- Making Aircraft Models.
- Learning japanese.
